SCALE OFF
solution for hard water problem

SCALE OFF WATER CONDITIONER

is a natural, anti-Scaling & rust proof hard water treatment system. It works by altering the crystallization behavior of Calcium and Magnesium ions such that they lose their ability to cause adhesive scale. This process is very successful. Scale Off (Natural Water Conditioning System) solid device we connect online on the outline of the Tanks. The effect of the device is instant.

Understanding Problem Due To Hard Water

And Solution Through Scale Off

BATHING : The hard water effect the tissues and pores of the skin make it more ruff and dry causing lake of freshness whole day. Bathing with soap in hard water leaves a film of sticky soap curd on the skin. The film may prevent removal of soil and bacteria. Soap curd interferes with the return of its normal, slightly acid condition, and lead to irritation. **Soap curd on hair may make it dull, lifeless difficult to manage.** Hard water also cause hair fall and lacks of softness. **While Scale Off water conditioner the lusters and freshness, softness of the skin maintained. It also makes your hair silky, shiny and controlled hair fall problem.**

LAUNDERING : Clothes washed in hard water often look dingy and feel harsh and scratchy. The hard water clogs the detergent in the fiber of the clothes and doesn't allow the detergent to be completely washed off. Continuous laundering in hard water can damage your skin as well as damage fibers of the fabric and shorten the life of clothes by up to 40 percent. **SCALE OFF WATER CONDITIONER can get back the sign and longevity of the clothes by completely washing the detergent from the fiber of the clothes and saves your skin from damage.**

DISH WASH : When washing dishes, hard water may cause spotting and filming on your crockery. The minerals from hard water are released faster when it comes into contact with heat, causing an increase in the amount of spotting and filming that occurs. It can be a nuisance to clean and reduce the quality of your crockery. **Scale Off Water Conditioner soap can be removed faster from your crockery means it requires less water.**

PROBLEMS IN WATER GEYSER, WATER COOLER AND PIPE WORK : Hard water also contributes to inefficient and costly operation of water-using appliances. Heated hard water forms a scale of calcium and magnesium minerals (lime scale deposits) that can contribute to the inefficient operation or failure of water-using appliances. Pipes can become clogged with scale that reduces water flow and ultimately requires pipe replacement.

THE ADVANTAGES SUMMARIZED BENEFIT OF SCALE OFF (NATURAL WATER CONDITIONING SYSTEMS) V/S CONVENTIONAL RESIN WATER SOFTENERS

- 1 PRICE :** When Scale Off (Natural Conditioning System) is considerably lot cheaper
- 2 MAINTENANCE :** Scale Off (Natural Conditioning System) requires practically no maintenance and the device is virtually indestructible. Resin softeners cannot function without regular salt charging.
- 3 RUNNING COSTS :** Scale Off (Natural Conditioning System) has no parts to be replaced, and therefore absolutely no maintenance costs. Resin softener ages and has to be replaced. Valves in softener are volatile and can be problematic. Scale Off (Natural Conditioning System) on the other hand has no moving parts.
- 4 COMFORT :** Easy installation Scale Off (Natural Conditioning System) is an in-line unbreakable, practical device with no moving parts. Power interruptions confuse rinse cycle in fully automatic resin softeners.
- 5 SAVING :** Scale Off (Natural Conditioning System) saves on chemicals, soaps, detergents, acids, shutdowns, downtime, and equipment replacement costs manpower, The Scale Off device uses no electricity.
- 6 HEALTH :** Skin rash and irritations are minimized with Scale Off (Natural Water Conditioning System). Scale Off (Natural Water Conditioning System) enables the body to continue absorbing calcium and magnesium in water. Those substances - essential for building of cells in bone, teeth, hair and nails-remain in the water. Resin softeners remove calcium and magnesium and deprive the body those essential nutrients.
- 7 TRANSPORT :** Scale Off (Natural Conditioning System) is smaller and more compact than resin softener, and may easily be disconnected and taken with when owner moves house.

Benefits of Scale Off

(A) ON OUR BODY

1. It helps keeping our skin pores unblocked, and thus helps our skin from chapping, itching, and dryness.
2. It may also enable you to use lesser quantity of soap, shampoo, and skin care products because it increases the efficiency with which they work.
3. Soft water is gentle, and so we get soft, clean & clear skin, with soft & silky hairs.

(B) ON HOUSEHOLD

1. No scale buildup... ever! on household Appliances and plumbing systems.
2. Long lasting household appliances and plumbing systems.
3. Quicker and easier house cleaning.
4. Energy saving (every 1 mm of scale on household electrical appliances means 10% more electricity consumption).
5. Cloth easily washable
6. Soft water helps soap do its job.

(C) FOR AGRICULTURAL / PARK / GARDEN

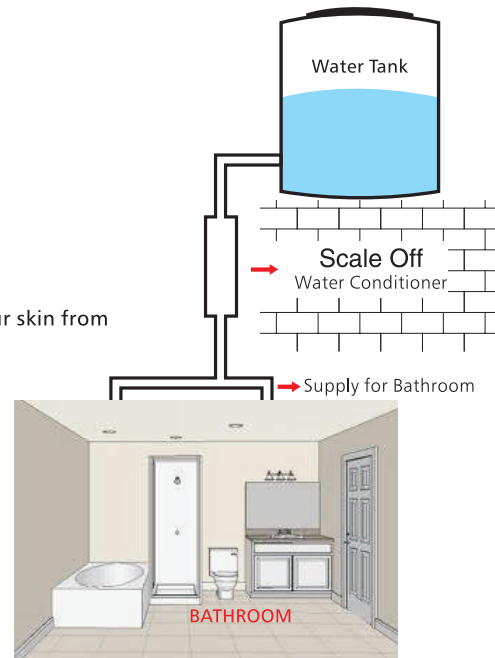

1. Water spread smoothly on soil during irrigation
2. Reduce water wastage and water evaporation
3. Helpful to maintain the fertilization power of soil

(D) COMMERCIAL

1. Cost effective & maintenance free part of Industrial / commercial Water Management System
2. Get rid-off all hard water problems

(E) OTHER BENEFITS

1. No salt required for running
2. No electricity required for running
3. No resins required
4. No chemicals required
